Comment to add to make public to the planning.

Hope this is okay, happy for you to twig wording.

There's a few reasons why I object to the ramp for 122 cook Road Horsham rh12 5GQ

The driveway will be taken away as parking space loss of parking space due to not being able to open the car door and space being taken away due to the ramp which adds another car onto the road as they have two cars. She has visitors over more often - sometimes every other day and other neighbour has visitors over and myself have to have support and have visitors who struggle to park if I have friends over due to them park unreasonably .

This will have an impact on everyone down the road. Everybody around the round has at least two to 3 cars and maybe a work vehicle which will put even more pressure on finding a space due to spaces being all ready full as it is.

Housing association have already commented you cannot get emergency service assess straight your property and it is very tight getting around the road. Some disabled access is already blocked and people wanting to walk with pushchairs already cannot due to people parking on paths already.

Also there is no explanation is to why there is a door being out into the garage what is the explanation to this? Why is there a need for the extra door. The noise from the ramp is going to cause extra noise already coming from the property as it is and affect the neighbours.
