

Proposed Block Plan and Track

Notes:

The proposed barn site is on the northern part of the property hedged by tall conifers 2M away from boundary (Dim A). The site topography declines from south to north towards the conifers approximately -8 degrees, subsequently the barn ridge height would be substantially lower than all surrounding buildings.

The proposed track made from compressed hardcore to match the existing drive way.

Trees

- A: Tall Conifers
- B: Wild Birch

Client:

Rob Hogan,
Spring Farm,
Woodland Lane,
Horsham,
West Sussex,
RH13 6HU

Project:

Proposed outbuilding.
