22 Marshall Avenue

Horsham

W. Sussex RH12 4RD

NO TO HOUSES application Ref. DC/26/0671

There is a great shortage of water in a large area of Sussex has been since we moved here in 1969 & has steadily got worse over the years

G.P. surgeries Dentists & Hospitals full to capacity now

The housing is going to be built between 2 country lanes which lead on to roads around Roffey already congested with traffic from surrounding areas with new housing being built & more at Bonhunt under construction.

Roads are in desperate need of repairs to craters, many are not potholes any more & all roads properly resurfaced some not touched since early 1970's. not batched up.

The area is lovely, various walks to choose from, car parks, children play area under trees with blue-bells in spring, a pond, seating

PTO

an allotment, refreshment & farm shop
a not forgetting strawberry picking. a lovely place
for all ages to enjoy & the only one like this, this
side of Haslem & Crawley.

there is a more comprehensive outline on attached
sheet.

Yours hopefully for NO MORE HOUSES

A few ideas regarding housing & our local environment.

Essentials

Water We have for many years tolerated hose pipe usage, polluted rivers and surage in our seas because water companies have not thought of reservoirs & been fined millions of £'s. Instead of fines being spent on other things less important why not have Parish, District Councils rallied the government not thought of building reservoirs or constructing desalination plants. We are an island surrounded by sea water.

Health

all GP surgeries, Dentists & Hospitals in short supply. Horsham & Crawley Hospitals do their best but we need a local general hospital built in the Horsham area to accommodate patients instead of having to travel to Surrey. We all pay a mandate to H.D Council why no local hospital to treat Horsham's growing population

Roads

all the growing population in this area along with busy passes, traffic lights & chicanes cause no end of traffic jams already without new houses & roads to be made leading on to them.

It will be interesting to see the outcome of this application
