Comments Details

Commenter Type:	Member of the Public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	I fully support the development of a play area in the village. This will be a huge benefit to the children of the preschool, primary school and local community. Outdoor experiences are vital for children's health and wellbeing. Children and their families will benefit greatly from a place to meet and play. As a community we should be promoting children's physical development and providing opportunities for them to exercise and socialise in a safe secure play environment. Children have played in this park for many years and it's time to bring their laughter back to the heart of

the village. Please let us reinstate some play equipment in the park.

Kind regards
