Commenter Type:	Member of the Public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	I very much support this application to create a new space in the village where children can play together. Not only does this benefit the children but also the parents and grandparents who come together while watching their children play. As screen time increases in this modern world, it is essential that we encourage children to play outdoors, get off screens and to interact and play with other children.

The setting for the play park is ideally located in the middle of Colgate village next to the already popular village hall and with a car park for access of those outside the village beside it.

Kind regards
