

Heritage Statement, Bonwycks Place

The property at Bonwycks Place is a Grade II Listed Building, currently in use as a residential home.

The property was built around 1685 (Jacobean) in brick, has rosemary style roof tiles, and white and black leaded windows. In the 1970s, the property was divided into several lots and sold at auction. The house was split into two semi-detached houses. Bonwycks Place had two flat roof single storey brick extensions built on the east (reception room) and west (kitchen) elevations in the 1970s. The curtilage of the grade 2 listed building is the boundary of 1970s Bonwycks Place at that time.

The paddocks and fields to the south were later purchased by the then owners in the 1980s and added to Bonwycks Place title which are outside the listed building curtilage.
