Description

Please describe details of the proposed development or works including any change of use

Reconfiguration of the existing ground floor retail unit and erection of an additional storey to provide 5 additional self-contained residential dwellings (Class C3), resulting in a total of 6 residential dwellings, with associated alterations to fenestration and rear access.

Existing Use

Please describe the current use of the site

The site comprises an existing mixed-use building within Jengers Mead, Billingshurst.

The ground floor is currently occupied as a retail/commercial unit (Use Class E), with associated storage and servicing arrangements.

The first floor comprises an existing self-contained residential dwelling (Use Class C3).

Accordingly, the site currently comprises one commercial unit at ground floor and one residential dwelling at first floor. The application seeks to retain the established commercial use and existing dwelling while providing five additional self-contained residential dwellings through the reconfiguration and extension of the building.

The proposed development seeks to bring the long-vacant premises back into productive use, retaining the established commercial use at ground floor and providing additional residential accommodation above.

When did this use end (if known)?

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

☐ Yes

☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development site area of 0.2 hectares or below

Are there any priority habitats on or within 500m of your site?:

No

Can you evidence that you carried out a site assessment if the local authority disputes the presence of priority habitats?:

No

Please justify the reason why biodiversity net gain does not apply:

Biodiversity Net Gain – Exemption Justification The application site measures approximately 261m² (0.0261 hectares) and is therefore substantially below the 0.2 hectare threshold for the statutory BNG exemption applicable to planning applications submitted from 6 August 2026. The site comprises an existing developed mixed-use building within Billingshurst town centre, with the proposal principally involving the reconfiguration and vertical extension of the existing building. No Priority Habitat is identified within the site and the development does not involve the loss of any significant habitat. Accordingly, the proposal is exempt from the statutory Biodiversity Net Gain requirement. Notwithstanding the exemption, opportunities for proportionate biodiversity enhancements, including a green roof where feasible, will be considered.

Please read the help text for further information why developments may be exempt or not in scope.
