LEAN-TO SHED AT THE OLD SCHOOL HOUSE, LYNWICK STREET,
RUDGWICK,
RH12 3DG

HERITAGE STATEMENT

The proposed lean-to shed will be attached to the SW side of the garage, the side furthest away from the house. It will not extrude beyond the front or back of the garage and therefore will not be visible from the house in any way.
The garage itself is approximately 10metres from the house and in between the house and the garage there is a substantial bed with tall shrubs and salix trees, essentially separating the garage and drive into a separate area.
To the front of the house there are high laurel and hornbeam hedges, and the street entrance to the garage is through electric gates, with access to the house itself through two pedestrian gates, so the lean-to shed has no impact on the vision of the house in any way. Also, I removed the large coniferous stumps and a large stand of bamboo that was beginning to impact on the garage foundations, and planted a laurel hedge down the SW side of the shed site, and once the lean-to shed is completed, I intend to plant more laurels across the front of the lean-to so that it will be totally screened from the road.
I therefore believe that once completed, the lean-to shed will have zero impact on our listed building, The Old School House.
