Dear Emma

I strongly object to this proposed development.

As a resident of High Bar Lane, I am firmly opposed to this application. Our small area has already been subjected to significant development by Thakeham, and it is unacceptable that further land is being taken when the community has already borne more than its fair share.

This area is already affected by drought conditions, and approving additional housing would place even greater strain on limited water resources. It is irresponsible to continue approving developments in an area where basic environmental constraints are already a serious concern.

The land is also used by local wildlife, including bats and deer, and this development would inevitably damage or destroy important habitats. The environmental impact cannot simply be ignored.

In addition, there are no adequate roads, services, or facilities to support further housing in this location. Local infrastructure is already under pressure, and expanding development without the necessary support systems will only make the situation worse.

For these reasons, I strongly urge the council to refuse this application. I will continue to oppose this proposal and any further planning applications of this nature, alongside other concerned residents.

Please note, i have already submitted but you advised I needed to add my full address , Deevona , High Bar Lane, Thakeham, West Sussex, RH20 3EH. So can you confirm this objection has now been registered.

Regards, [REDACTED]
