Tree No.	Species	Condition	Recommendations	Age	DBH	Height	No. of stems	Crown sprea
T1	Oak	Minor deadwood in crown.	Remove deadwood. Reduce height by approximately 2m. Reduce lateral spread by approximately 2.5m.	M	400	19	1	11
T2	Oak	Minor deadwood in crown. Historical pruning wounds. Small cavities at base. Signs of early decay in bark to 0.5m	Remove deadwood. Reduce height by approximately 2m. Reduce lateral spread by approximately 3m to south and 2.5m to north	M	450	18	1	14
T3	Oak	Car port built around trunk. Deadwood throughout crown. Poor vitality in upper crown tips, typically symptomatic of low water uptake.	Fell to height of car port	M	850	22	1	17
T4	Oak	Deadwood in crown. Historical pruning wounds. Evidance of bracket fungus (removed prior to inspection), possibly Ganoderma	Fell to ground level on clients request.	M	500	22	2	10
T5	Oak	Minor deadwood in crown. Historical pruning wounds	Remove deadwood. Reduce height by approximately 3m. Reduce lateral spread by approximately 3.5m to south, 2.5m to north.	M	500	22	1	
T6	Oak	Deadwood in crown. Historical pruning wounds	Remove deadwood. Reduce height by approximately 2m. Reduce lateral spread by approximately 2.5m.	M	450	20	2	11
T7	Oak	Deadwood in crown. Historical pruning wounds	Remove deadwood. Reduce height by approximately 2m. Reduce lateral spread by approximately 4m south, 4m north	M	550	22	1	14
T8	Oak	Deadwood in crown. Historical pruning wounds	Remove deadwood. Reduce height by approximately 2m. Reduce lateral spread by approximately 2.5m.	M	450	20	1	11
