Thank you for your email of 13th June.

As requested I can confirm that the 1x Silver Birch at 13 Meiros Way is subject yo TPO/0822 and not within a Conservation Area.

I attach a location sketch for reference purposes, I hope this is adequate.

The reason for the proposed surgery is to ensure the Silver Birch height and shape is maintained and in keeping with the surrounding area. The approximate height pre surgery is 9.28 metres and Crown width 2 metres.The proposed surgery is to reduce the height by approximately 3 metres, this in turn will obviously show an increase in the Crown which at this time is difficult to determine until the work has been carried out.

I look forward to hearing from you soon.

Kind regards

John Swann
