Subject: Re: Tree Application Invalid - DC/26/0104 -

Apologies for the delay as requested please see below:

T1: CURRENT HEIGHT 20METRES TO BE REDUCED BY 17.5 METRES - CURRENT WIDTH 6 METRES TO BE REDUCED TO 4 METRES

T2 CURRENT HEIGHT 20 METRES TO BE REDUCED TO 18 METRES - CURRENT WIDTH 18 METRES TO BE REDUCE TO 15.5 METRES

T3: CLIENT WILL REPLANT A REPLACEMENT TREE

T4: CURRENT HEIGHT 20 METRES TO BE REDUCED TO 17.5 METRES - CURRENT WIDTH 10 METRES TO BE REDUCE TO -7.5 METRES

T5: CURRENT HEIGHT 18 METRES TO BE REDUCE TO 15.5 METRES HEIGHT - CURRENT WIDTH 12 METRES TO BE REDUCE TO 9.5 METRES.

T3- has been pollarded significantly excess dead branches in canopy. It is also being suppressed by more dominant trees. I feel a fell and replant would viable as the oak tree isnt a high amenity value tree due to its aesthetics and poor pruning cuts being done prior. Will plant a replacement.

Best regards

Cheryl
