RE: DC/23/1795 Woes Cottage - Replacement of patio doors, kitchen and bedroom windows (Listed Building Consent)

Wed 07/02/2024 10:05

The heritage statement refers to ensuring the front of the property is not affected. The rear elevation of the timber framed portion is as important. It is also correct that the altered appearance of the modern extension does not exacerbate the harm. The timber window at first floor may be historically significant and information should be provided to confirm whether this is the case or not.

The windows in the brochure are not appropriate for the historically significant portion of the cottage. However, flush fitting casements as illustrated on p. 15 of the brochure are acceptable for the flat roof extension.
