I wish to object to the planning of 68 dwellings on the land north of Little Slaughterford for the following reasons....

Barns Green has always been classed as a rural small village and to build a further 68 dwellings on the back of the 34 dwellings being built at Sumners Ponds would change the very identity of Barns Green

These proposed dwellings, together with the current Sumners Ponds development would create 100 new dwellings. How can Barns Green cope with the increase in demands on services. Barns Green already suffers from water, drainage and sewage problems so any further developments will cause public health and environmental problems and concerns.

Chapel Road has become busier over the years and especially more recently with the development at Sumners Ponds. Parents are having to be extra vigilant whilst taking their children to playgroup, school, playgrounds and weekly activities. The proposed development will only exacerbate the dangers and cause more unwanted stress on parents.

The land in question has been a green area for a long time with mature hedgerows and trees and various wildlife have always been present. This site and hedgerow contributes to very character of Barns Green as a village
