
Sorry for the delay in getting back to you.

The planned works are to remove up to 2m off of the lateral branches that overhang the two properties on the southern side of the tree. No reduction to the height. The starting length of the lateral branches are between 6-8m in length. So final length will be around 6m as we will only be reducing the longer sections to bring the side in.

If you require any further information the please ask.

Many thanks,

Mike
