

Hi Sophie

In light of seeing the fire tender access drawing, I think it would be best to swap the location of the cycle store & bin-store around like you have suggested.

One of our isolated property trucks (smaller trucks 15-tonne) already accesses the site from Greyfriars Lane, so accessing the carpark area will be fine.

It's just that we wouldn't be able to access the bin-store in its current location, and wheeling the bins through the carpark isn't ideal....especially when full.

Having the bin-store on the corner instead would be perfect.

Kind regards

Josh Ives
