Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Highway Access and Parking - Other - Trees and Landscaping
Comments:	The proposed wall is higher than all other permanent structures in surrounding front gardens and would set a damaging precedent for other planning proposals. I am concerned that the wall will restrict the view at the junction between Amberley Road and Greenfields Way. I feel the current area has a natural feel with numerous trees and shrubs. Adding tall hard structures will detract from this and lead

to a less pleasant environment.

I note that the wall has been built closer to the neighbour than the previous fence. This could mean that the neighbour would have to move their drive over to accommodate their vehicles.

If they had to do this it would impact on us as other vehicles would have to park closer to us and make it harder for us to get out of our own drive.

Shrubs have been removed to allow for the wall to be built and there are several trees nearby that could potentially fall onto the wall.

Kind regards
