Hi Emily,

Can you confirm the illumination value of the projecting sign please? I'll then upload that as supporting statement so we have the value to be used for the fascia advertisement and the projecting sign.

Thanks

Good afternoon Jacques,

Following on from your conversation with my colleague Caroline, please see an email below sent in August about the light intensity of the fascia signage. The image is from another site in Worthing.

We had confirmation from the signage contractor that the statement levels are correct with the fascia illuminated at 500cdm2.

We have also had confirmation from the client that they do want the projecting hanging sign to be illuminated as per image below. The Projecting Sign Lighting is LED 6000K, Lux 243.

I have attached an updated drawing showing the projecting signage lighting, please let us know if you require any more information.

Kind Regards,

Emily Howarth

Hi,

Regarding application: DC/24/1174
Installation of 1x internally illuminated fascia sign, 1x non-illuminated projecting sign and signage to front of awning.
57 West Street Horsham West Sussex RH12 1PL

We have been asked to provide the following information regarding the application:

Please provide a lighting statement. Lighting details of the spread of light and the operating hours for your internally illuminated sign.

The lettering is Halo effect produced by LED lights inside the lettering, reflecting through the back of the letters to produce a light halo around the letters as photo below. The light intensity is 500cdm. Operating hours of internally illuminated sign: 7am – 19.30pm

I hope this covers everything.

Kind regards,

Natasha Champ
