	Cereal cropland. No retention due to land use change.
	Small area of mixed scrub within centre of the site. Enhancement not possible as this would require the creation of glades and the parcel is likely too small.
	BNG 'veteran' trees. Inclusive of T25 (NPPF veteran). Consists of seven 'very large' trees (T9, T19, T22, T25, T2 and x2 within G6) and one 'large' tree (T27)
	T24 to be removed - extracted as it's own recorded feature as per page 60 of the user guide.
	Four individual trees on site not otherwise captured within treelines or hedgerows (as stipulated in the User Guide, page 60). These are trees: T4, T5, T26 and T27. T2 is also considered an isolated tree but that is recorded in the BNG veteran tree row.
	Two small areas of the arable field fall within the West Sussex ACIB of the LNRS

0.01	0.09	Approx. 10m 'lost' for through-road although this will utilise an existing gap between trees and will not incur any felling. Enhancement not possible as although this treeline wil benefit from the same enhancement as LT2, it fails criterion B in addition which would not change post development, so can only be moderate condition.

Cumulative length of all newly created hedgerows to the north and south of development parcels. Hedgerows must be 'species-rich native hedgerow with trees' in order to meet the trading rules.	
A 7m long stretch of the newly created species-rich native hedgerow with trees will be planted atop a bank in order to meet the trading rules.

LT2 is failing criterion D at baseline due to intensive farming practices within 6m on both sides. This land management practice will be ceased through land use change and over 6m either side of the treeline will be vegetated wildflower planting and/or public open space amenity grassland.

User Comments
Enhancement by removing encroachment from arable land within the Site. Approximately 2m will be 'lost' due to the installation of a small headwall as an outfall from the westernmost attenuation basin.
Ditches not accounted for because to qualify as a 'ditch' worthy of recording on the watercourses tab, it needs to hold water for at least 4 month of the year and because they are otherwise accounted for in the hedgerow habitat categories selected.
