NOISE MANAGEMENT PLAN

1. Potential Noise Sources

- **Barking**: This is typically the primary source of noise.
- **Playtime**: Dogs playing together can also generate noise.

2. Management Controls

- **Clause in Contract:** Terms and conditions clearly state that all clients must be conmscientious towards neighbours and landowners and prevent dogs from barking. If dogs persistently barks you will be asked to leave without a refund and will not be allowed to rebook.
- **Supervision**: Always have someone present to manage and control barking.
- **Training**: Train dogs to minimise excessive barking.
- **Grouping**: It would always be dogs that are familiar with one another.
- **Soundproofing**: A hedge has been planted between us and any neighbours

3. Operational Hours

- **Set Hours**: 7am until 7pm in Summer. 8am until 4pm in Winter

5. Community Engagement

- **Feedback**: We have already been using the paddock and neighbours have all said they do not hear any barking.

6. Regular Monitoring

- **Noise Levels**: I will be around a lot and regularly monitoring noise levels and adjust strategies as needed.
