Dear Sir/Madam,

Proposal: Outline application for the erection of approximately 24 residential dwellings, with all matters reserved except for access.

Site: Land at Station Road, Warnham, West Sussex, RH12 3SR.

Thank you for your correspondence, please see our comments below regarding the above application.

Surface water discharge to Foul/Combined Network

Southern Water will refuse any request to discharge surface water into our 'foul only' sewer network. Applications for surface water connections into a combined sewer will only be permitted if; a) there are no alternative options under the surface water disposal hierarchy, and b) there is capacity*. If none of these criteria can be met, then the Applicant/Developer at their cost will need to requisition or provide a new surface water only sewer to serve the development. This includes where the surface water hierarchy has been followed, and all alternative options have been exhausted. This approach ensures that we work together to better protect the environment, improve water quality, and reduce flood risk. It also supports our work to separate rainwater from sewage at source to meet storm overflow reduction targets under Defra's Storm Overflows Discharge Reduction Plan, as well as to reduce the number of sewer flooding incidents that are caused by hydraulic overload of our sewer network during periods of sustained rainfall.

The above is supported by our Surface Water Management Policy, which is available to view on our website. It is also supported by the National standards for sustainable drainage systems (SuDS) - GOV.UK which states the following in Paragraph 1.10 - Surface water runoff from the development shall not discharge to a foul drainage system.

Condition

Southern Water does not accept surface water flows into the foul network. Please refer to the Surface water management

<https://www.southernwater.co.uk/media/l23dbon0/surface-water-management-policy-120724.pdf>.

Existing Southern Water Assets – General within boundary but no tree, buildings, assets within standoff distance (approximate)

Please see the attached extract from Southern Water records showing the approximate position of our existing sewer crossing/in the vicinity of the development site. The exact position of the public assets must be determined on site by the applicant in consultation with Southern Water before the layout of the proposed development is finalised. To get in contact to confirm the exact position of the asset please visit; https://www.southernwater.co.uk/media/ph4fk3pe/ds-location-of-rising-mains_pb.pdf.

For information on required stand - off distances from public sewers please refer to: <https://www.southernwater.co.uk/media/st5orjvm/stand-off-distances.pdf>

Tree Planting

We have restrictions on tree planting adjacent to Southern Water sewers, rising mains or water mains. Reference should be made to Southern Water's publication "A Guide to Tree Planting near water Mains and Sewers" (https://www.southernwater.co.uk/media/pddob0vn/ds-tree-planting-guide-1_nwm.pdf) and the Sewerage Sector Guidance (<https://www.water.org.uk/sewerage-sector-guidance-approved-documents/>) with regards to any landscaping proposals and our restrictions and maintenance of tree planting adjacent to sewers, rising mains and water mains.

Condition

In order to protect public apparatus, Southern Water requests that if consent is granted, the following pre commencement condition is attached to the planning permission; The developer must advise the local authority (in consultation with Southern Water) of the landscaping proposals in proximity of public apparatus in order to protect it in accordance with Southern Water's guidance, prior to the commencement of the development.

Proposed SUDS features

If it is the intention of the developer for Southern Water to adopt the proposed SuDS, the system shall be designed and constructed in line with the Design and Construction Guidance www.water.org.uk/sewerage-sector-guidance-approved-documents/.

No Soakaways should be connected to the public surface water sewer.

The supporting documents make reference to drainage using Sustainable Drainage Systems (SuDS). Where SuDS form part of a continuous sewer system, and are not an isolated end of pipe SuDS component, adoption of SuDS will be considered if requested by the developer if they comply with: Design and Construction Guidance (Appendix C), CIRIA guidance and Southern Water SuDS Guidance available here:

<https://www.water.org.uk/sewerage-sector-guidance-approved-documents/>

<https://www.ciria.org/ItemDetail?iProductCode=C753F&Category=FREEPUBS>

<https://www.southernwater.co.uk/media/l4ndl3db/suds-final-080824.pdf>

Where SuDS rely upon facilities which are not adoptable by sewerage undertakers the applicant will need to ensure that arrangements exist for the long-term maintenance of the SuDS facilities. It is critical that the effectiveness of these systems is maintained in perpetuity. Good management will avoid flooding from the proposed surface water system, which may result in the inundation of the foul sewerage system.

Thus, where a SuDS scheme is to be implemented, the drainage details submitted to the Local Planning Authority should:

- Specify the responsibilities of each party for the implementation of the SuDS scheme.
- Specify a timetable for implementation.
- Provide a management and maintenance plan for the lifetime of the development.

This should include the arrangements for adoption by any public authority or statutory undertaker and any other arrangements to secure the operation of the scheme throughout its lifetime. This initial assessment does not prejudice any future assessment or commitment to any adoption agreements under Section 104 of the Water Industry Act 1991.

S106 Connection application

Any new connections to the public sewerage system will require a Section 106 connection application to be submitted and approved by Southern Water Services.

To make an application visit Southern Water's Get Connected service:

<https://developerservices.southernwater.co.uk> and please read our New Connections Charging Arrangements documents which are available on our website via the following link:

<https://www.southernwater.co.uk/developing-building/connection-charging-arrangements>

Please note that, where there are separate systems available, Southern Water will not allow surface water to connect into the public foul sewer. If this is not possible, please provide evidence that all other options have been explored.

It is possible that a sewer now deemed to be public could be crossing the development site. Therefore, should any sewer be found during construction work, an investigation of the sewer will be required to ascertain its ownership before any works commence on site. If this happens, please call our Customer Service Desk on 0330 303 0119

For further advice, please contact Southern Water, Southern House, Yeoman Road, Worthing, West Sussex, BN13 3NX (Tel: 0330 303 0119)

Website: southernwater.co.uk or by email at: SouthernWaterPlanning@southernwater.co.uk

Yours faithfully,

Future Growth Planning Team
