Comments summary

Dear Sir/Madam,

Planning Application comments have been made. A summary of the comments is provided below.

Comments were submitted at 16/03/2026 3:29 PM.

Application Summary

Address: Land North West of Southwater

Proposal: Outline planning application, with all matters reserved (except for primary access to the highway) for a phased development comprising: the demolition of existing buildings and the construction of residential dwellings (including affordable housing) (Use Classes C2 and C3); a mixed-use neighbourhood centre (Use Classes E and F); education facilities (Use Class F1(a)); business and employment floorspace (Use Classes B2, B8 and E(g)); redevelopment of existing agricultural buildings including construction of a building for community use (Use Classes E and F2); improvements to public rights of way; sports pitches; gypsy and traveller pitches/plots; public open space; landscaping, and associated infrastructure.

Case Officer: Matthew Porter

Commenter Type: Consultee

Stance: Customer objects to the Planning Application

Reasons for comment: - Overdevelopment

Comments:

I am objecting to the Berkeley Homes proposal to build 1,000 homes northwest of Southwater because the drainage works required could permanently damage two areas of ancient woodland. Courtland Wood and Smith's Copse lie immediately alongside the proposed development site. Both are designated ancient woodlands - habitats that have been continuously wooded for over 400 years and are considered irreplaceable under national planning law. Once damaged, ancient woodland cannot be restored. The threat is not just from bulldozers entering the woodland directly. Large-scale drainage engineering on Weald Clay can lower or alter groundwater levels across a wide surrounding area. Ancient woodland trees have root systems extending far beyond the woodland boundary, and changes to soil moisture caused by attenuation ponds and drainage channels nearby can kill these trees silently over years, without any direct physical contact. This is a well-evidenced, recognised risk - yet Berkeley Homes has not submitted any independent hydrological assessment of the impact their drainage works would have on these woodlands. A developer's own consultant assessment is not sufficient for something this serious and irreversible. I ask that the Berkeley Homes 1,000-home proposal be refused until a fully independent, peer-reviewed hydrological impact assessment on Courtland Wood and Smith's Copse has been completed and published for public scrutiny.

Kind regards
