

For the attention of Shazia Penne

Dear Ms Penne

I refer to the planning application DC/26/1057 and subsequently DISC/26/0208.

I am very concerned regarding the previous application to discharge conditions [as my earlier email] and the more recent DISC/26/0208.

This now seems to increase the height of boarding surrounding the area under consideration.

Whilst I have no objection to this increase in enclosure; I am concerned at the continuing changes to the proposals; which I trust are monitored by yourselves.

Please keep me informed of any further developments and note my concerns in respect of this beautiful site on the river walkway and any detrimental impact in respect of design and light pollution.

Kind regards
