Comments Details

Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Highway Access and Parking - Loss of General Amenity - Other - Overdevelopment - Privacy Light and Noise - Trees and Landscaping
Comments:	I object to this planning application as I feel it is infringing on the green and wildlife rich buffer zone between Horsham and the biodiverse st Leonard's forest. It is on a raised area of land so would impact the visual amenity of the area. With its raised elevation, the run off from the hard landscaping of road access and paving around the buildings would impact the Horsham riverside and local area and potential increase flooding. It also could potentially cause pollution into the watercourse locally. The suggestion that it would open up the riverside walk would be unlikely to work as increased water run off would flood that area which is already known to flood from surface runoff which would mean you would not be able to safely access this area anyway. At the moment that area of the river side is completely wild and opening it up to the public would have a negative impact. This development would impact environmentally our beautiful area and the biodiversity within it rather than create opportunities to increase it which

was muted previously. The road network is already busy and increased vehicles would impact negatively environmentally and the small narrow lanes nearby which the new inhabitants would use to get to local amenities would impact local infrastructure. It could potentially impact on wildlife on the currently quiet lanes including negatively impacting hedgehogs and deer and other wildlife. The bats which we know are in the local area would be negatively impacted by increased lighting and noise. There are plenty of brown field sites in Horsham that are still not redeveloped which would be more appropriate to use for development. The number of houses proposed even with the suggestion of public access areas is not proportionate to the local area. Even single story dwellings would impact the visual amenity of the area and the wildlife rich area. Building near the hedgerows even if leaving them will impact negatively on them and they are diverse because of the farmland around them that would then be lost. Horsham amenities are already overstretched with other developments locally and I do not feel it would cope with that scale of development.
I sincerely object to this development

Kind regards
