Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Design - Overdevelopment - Privacy Light and Noise
Comments:	After having reviewed the proposal I would like to comment as follows:- The plot is physically incapable of comfortably accommodating two separate dwellings Forcing two properties onto a plot of this size results in an excessively high density and cramming. This is further evidenced by the lack of space for garages. Both dwellings are situated too close to the boundaries. This tight

spatial layout fails to respect standard separation distances creating an unacceptably cramped layout.

The layout is out of keeping with the character and appearance of the road. The surrounding area is defined by single properties on generous plots with open spacing. Replacing this with two tightly squeezed dwellings will permanently disrupt the feel of the road and degrade the local aesthetic.

There will inevitably be extra traffic but the road is narrow and lacks structural capacity for more vehicles and it will result in more noise.

For these reasons, the proposal represents an inappropriate layout that directly conflict.

Further to my previous comments I would like to add the following regarding the front extension.

Unless the roof is flat on that extension it will increase the height and bulk of the development. It will cause a severe reduction in natural light to my kitchen and lounge/diner.

The mass of the higher roof line so close to the boundary will feel claustrophobic and overbearing when viewed from my kitchen and living area, drastically reducing my quality of life and enjoyment of my home.

Kind regards
