

Good afternoon Shazia,

Thank you for sending through some site photos. It is considered that the proposed development would present a low risk to great crested newts and/or their habitats. However, as the development is within the red Impact Risk Zone, as modelled by district licence mapping, I recommend that the following informative should be attached to planning consent:

*“The applicant is reminded that, under the Conservation of Habitats and Species Regulations 2017 (as amended) and the Wildlife and Countryside Act 1981 (as amended), it is an offence to (amongst other things): deliberately capture, disturb, injure, or kill great crested newts; damage or destroy a breeding or resting place; intentionally or recklessly obstruct access to a resting or sheltering place. Planning permission for a development does not provide a defence against prosecution under this legislation. Should great crested newts be found at any stage of the development works, then all works should cease, and a professional and/or suitably qualified and experienced ecologist (or Natural England) should be contacted for advice on any special precautions before continuing, including the need for a licence.”*

Additionally, all works shall be carried out in accordance with the following measures:

- Any demolition materials should be stored in skips or similar containers rather than in piles on ground
- Any trenches left overnight should be covered or provided with ramps to prevent great crested newts from becoming trapped.
- Any building materials such as bricks, stone etc. should be stored on pallets to discourage great crested newts from using them as shelter.

Best wishes,

Laura Downs *(she/her)*

District Licensing Officer (Great Crested Newts) – West Sussex
