Reasons for comment:	- Highway Access and Parking - Other
Comments:	Re: Planning Application DC/26/0121 I would like to bring to your attention the following points all being made as a result of reading MME Planning Services Document P-014, January 2026, Version 1. 1. I opposed previous application DC/24/0015 due to flooding of Storrington Road close to the bend and immediately outside of

Crescent Place. The problem has continued and with increasingly high rainfall in the winter months remains a problem. My home has a stream to the north of my garden which flows behind Crescent Place and then westward under Storrington Road where I understand the infrastructure has broken down causing dangerous conditions which are likely to be worsened by house building in the vicinity.

The stream has been high again this year, running at speed making its way (I believe) to the River Stor in Storrington.

Video available showing the above!

2. The document mentions footpath accessibility across Storrington Road. The proposed entrance is close to a bend so accessing the pavement safely is very questionable and once on said pavement it is not an adequate width to walk two abreast so pushing a buggy with another child walking is not safe. Much of the walk to Storrington is as such so it is likely that car use would be essential and therefore not sustainable as outlined in point 6.6.

Kind regards
