Dear Marie

Re: Blenheim Rise, Lower Street, Pulborough

Further to my formal representation submitted on 31st August, I am submitting the attached photograph below as supplementary visual evidence regarding the impact of the proposal on my property's privacy and residential amenity.

Key Observations from the Attached Photograph:

Direct Line of Sight: The photograph was taken directly from my first-floor [REDACTED] bedroom window looking towards the application site on the day of the site visit.

Failure of Existing Screening: As clearly demonstrated in the image, four adults standing on the elevated access path are fully visible over the existing boundary fence line.

Demonstrated Overlooking: This provides clear, visual evidence of the direct eye-level sightline into my living space. Building a raised deck structure at or above this elevation will create a severe, unmitigable loss of privacy.

I request that this image and note be formally added to the planning file and considered by the case officer during the assessment of this application.

Kind regards

[REDACTED]
