| Comments:            | <p>The car park will be at the bottom of my garden, my objections are as follows:</p> <ol style="list-style-type: none"><li>1. We will have a road to front and back of our property causing noise and pollution.</li><li>2. We have a street light in front of our property which lights the house half the night, the car park lights will do the same at the back, shields don't work!</li><li>3. The acoustics of the field will bring all pre college and post college greetings resonating up the gardens. We experience this on open evenings, that's just once or twice a year, this will be constant.</li><li>4. Which ever way cars are parked we will have either headlights shining up the garden or exhaust fumes, this concerns me. Parking involves more maneuvering therefore more engine revving etc.</li></ol> <p>Parking in the avenue is testing to say the least, at times you are unable to get in or out due</p> |

to volumes of students and cars, when I have guests they make sure they leave in time to avoid it! The thought of having this back and front of the property fills me with dread.

---

Kind regards
