

Regarding DC/26/0087

I would like to make an objection to planning DC/26/0087 in the basis of:

1. Side window on proposed south elevation plan will be overlooking to the garden area and kitchen window, causing a loss of privacy (draw with number 1)
2. Elevation of ground floor ceiling still generates an enclosure feel. This was not part of the original planning and has been added to this new planning (draw with number 2)
3. I still consider this build to be an overdevelopment for the area as no similar properties can be found around. This is an overwhelming construction that will surround and feel intrusive to the adjacent property 46 Barrington Road, causing a clear loss of privacy.
4. Big glass door at the end of the garden will have direct view to our bedroom window, we didn't see that in the previous planning permission. This will directly affect privacy in our bedroom. If plan is approved, we want that patio door to either:
 - Remove any doors that could have a direct view to our bedroom in that wall (building has already skylight windows that will provide enough light in the rooms)
 - If windows are used in that wall, to use a privacy friendly glass, like frosted glass and avoid fully open windows that can have direct view with our bedroom window.
