Description

Please describe details of the proposed development or works including any change of use

Replace the roof over the lean-to annex, to allow floor level in kitchen and WC to be raised to allow level floors to improve disabled access.
The roof will be upgraded to current levels of insulation and ventilation to meet building regulations standards.

Has the work or change of use already started?

- ☐ Yes
☒ No

Explanation for Proposed Demolition Work

Why is it necessary to demolish all or part of the building(s) and/or structure(s)?

The existing roof over the annex is too low. This means that the floor level of the annex is below the floor level of the main hall.
The result of this is that there are steps down into the kitchen area and into the WC.
This means that these areas are not accessible for disabled use.
The floor level needs to be raised to allow disabled access to the WC. This means that the roof needs to be raised.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

☐ Yes

☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Under 25 square metres

Please justify the reason why biodiversity net gain does not apply:

This is a replacement roof, there is no extension of the foot print of the building, there is 0 loss of any ground cover.

Note: Please read the help text for further information why developments may be exempt or not in scope.
