Hello Sam

I see another anonymous letter has been added to the file on 8th May, again full of misinformation.

They set out a detailed case, but fail to appreciate that the Village had their chance to be pro-active all of last year when we tried to engage with the Parish Council and the residents, where were these anonymous people when the opportunity arose?

It's all very well finding fault with our business model, but some of the ideas put forward by the latest letter, would require change of use and planning permission/listed building consent, etc.

The waiting is becoming intolerable now, can we please have an answer.

Very best regards

Judy
