Comment against development at Hornbrook farm Brighton road.

I'm not against development in general as I am aware of the requirement of more houses. As a neighbour I'm not even against the location or anything with the development itself. But... 180 properties, which surgery are they belonging to? Which hospital are they going? What school are the children going to? We have been struggling to get an appointment at Park surgery in Horsham for years and it is only getting worse. The hospital is far overdue a rebuild/relocation. Maybe you know more than I do and if so, it would be great to share these details with the rest of us because we are extremely concerned that the amenities are insufficient for such a development. Maybe sort out the amenities first and then build the houses?
