

Hi Sophie

I have reviewed the reports submitted for Condition 13 (acoustic impact assessment) and 18 (lighting scheme) to approved application DC/24/1985.

The report provided for condition 13 is satisfactory and the condition can be discharged.

The report provided to discharge Condition 18 refers to a RELUX lighting model dated 23.06.2026. I would recommend that a copy of this modelling report is provided to the LPA for review before the condition is discharged.

Regards

Lee
