

**WSSC CONSULTATION RESPONSE:
County Planning – Minerals & Waste Planning Authority**

TO:	Case Officer: Alice Johnson
DATE:	20/08/2025
LOCATION:	Danefold House, Littleworth Lane, Partridge Green West Sussex RH13 8NA
SUBJECT:	DC/25/1023 Relocation of existing farm yard manure storage, construction of a silage clamp and construction of a slurry lagoon incorporating importation and use of materials and all associated engineering works.
RECOMMENDATION:	☐Advice ☐More Information ☐Objection ☐Consulted in Error ☐No Objection ☒No Objection Subject to:

The application site is located within a Mineral Safeguarding Area for Brick Clay. That said, the site area (2.4ha) is beneath the threshold for consultation (see para 2.4 of the Mineral and Waste Safeguarding [Guidance](#)), and so it is considered that no significant degree of mineral sterilisation would occur as a result of the development. Therefore, the MWPA would offer no objection to the proposal from a Mineral Safeguarding perspective.

The proposed development necessitates the importation of materials, specified to be a non-waste CL:aire compliant recycled aggregate. Further, the development in principle relates to the importation of horse manure to the site, albeit this is understood to be sourced from within the wider farm complex.

The LPA should be satisfied that the proposed development would not involve the importation of waste (i.e. the proposal would not be wholly or mainly for the management of waste) and, subject to this, the MWPA would offer no objection.

Kind regards,

Edward Anderson (Planner)
