Comments Details

Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application
Reasons for comment:	- Highway Access and Parking - Other - Trees and Landscaping
Comments:	I strongly object to the planning application DC/25/2057, on the grounds of recent data regarding water and sewage management and its validity claim, we as a village have sewage and flooding issues already which is an environmental concern, plus recent

reports and findings on water companies, therefore I would like a more in depth investigation on effects on Barns Green of the water company reports for validation, environment and health of the community is paramount and we do not need anymore sewage issues. The 68 additional houses and there proposed location will change the character of the village which is important to many residents who enjoy the community and wellbeing it offers us, it is such a lovely village we have a duty of care to stand up for it. The damage to trees and wildlife habitats is concerning as it has knock on effects to countryside which should be protected. The issue of parking and access road from the proposed buildings is an accident waiting to happen which additional traffic onto a narrow road with the elderly and school children at particular risk. We are poorly served with public transport so more cars during peak times and the CO2 additional emissions. I believe that some of the current new builds in the village are still unoccupied, I question why we need more houses in the Village as we have already welcomed new builds at Sumners Pond and The Ashmiles.

Kind regards
