3.14 Flat Blocks

The flat blocks within Phases 3D, 3F, and 3G remain largely unchanged from the approved Reserved Matters scheme. Their scale, massing, siting, and overall design continue to reflect the originally approved layout, ensuring consistency across the development.

A small number of minor amendments have been introduced to improve integration with the surrounding development. These changes include subtle adjustments to porch designs and window articulation, which enhance the visual interest of the elevations while maintaining the established architectural character. The amendments are limited in scope and do not alter the overall appearance, footprint, or functional layout of the flat blocks.
