To Whom It May Concern

Please accept this letter as confirmation that the national utility infrastructure provider GTC as **Roddy New Homes** chosen fibre provider, will install Gigabit capable fibre connections to the development detailed in the planning reference above.

The Gigabit capable fibre network will be installed by GTC and subsequently owned and operated by Open Fibre Networks Limited (OFNL). The fibre network is fully ducted and utilises GPON as its underlying access technology.

This fibre network will provide customers with immediate access to Gigabit services from the first date of installation. The network is Open Access and currently provides a choice of residential internet service providers and business communication providers.

Yours sincerely,

Chloe Stevenson
