Dear Andy,

Under Section 2011 of the Town and Country Planning Act 1990, I am making an application in respect of the following tree works:

A. Scots Pine - photo attached

Remove one large limb overhanging front garden, as well as the less prominent branches in order to remove weight bias and stabilise the tree ensuring better balance.

B. Maple Tree - photo attached

Large Maple tree located at the bottom of the back garden and adjacent to the garden room to be climbed and reduced as previously carried out to approximately 20% of the upper canopy to minimise the size and greatly enhance the light to the borders below. The overall shape will be trimmed in to form a well balanced canopy throughout.

C. Thuja - photo attached

Large Thuja tree situated in the middle of the back garden to be climbed and sectionally dismantled using approved rigging techniques to avoid any damage below the canopy.

Please let me know if I can provide any further information.

Kind regards,
Philip
