Please see info below, based on conversation I've had with our client –

The oak and rowan are in the rear garden, a resident has requested a Japanese Maple to be planted in their place, so that's 1.
Goat Willow in the car park will be replaced with another goat willow plus 1 other tree, to account for only 1 in the garden being replaced. That's 3.
The plum to the front will be replaced with either another plum, or a tree of similar variety. Total of 4 to replace 4 removed trees.

All trees will be planted as standards and will be planted this coming autumn winter, to give them the best possible start.

If you need any fither info please do let me know.
