My husband and I have lived in Barns Green since [REDACTED]. We chose to live here as we loved the rural setting and size of the village. I object to the proposed development as I feel it would have a detrimental effect on the character of the place. The landscape would be so changed with loss of trees and hedgerow, more traffic to be accommodated, alterations to the road layout and an increase in the risk of flooding in Chapel Road, where the village shop already has this threat. Also, the village has had to accept two other developments in recent years and a further development would only increase demand and strain further vital services such as electricity, gas, water, drainage and sewage.

So PLEASE, let's 'Keep Barns Green Rural'.
