Hello,

As a grandparent to two small children who live on the A281, in Bucks Green, I am emailing with a heartfelt plea.

Please do not turn a blind eye to the need of a speed camera on this road, particularly when considering the number of houses you are planning to add to this area. Does there really need to do a child fatality before something is done?

On the days that I take my grandchildren to school, I refuse to walk them up. Despite it bearing less than 10 minutes by foot. I am terrified by the speed of the traffic, the size of the traffic and the proximity of the pedestrian footpath to these vehicles. The footpaths are far too narrow to be alongside a road of that size and with cars speeding as they do.

Imagine how many others choose to drive that short distance rather than walk? How ludicrous? In a society where we are all moving far too less, obesity is rising and climate change is on the rise, surely it is a no brainier? Make our ability to walk to school safer! Are you really putting profit and convenience of the safety of our community? Shame on you!

Regards,
