Date:	27th May 2025

Dear Sir/Madam,

Town and Country Planning Act 1990 (as amended)
Town and Country Planning (Development Management Procedure England) Order 2015

Approval of details reserved by condition 3 to approved application DC/24/1506.

Nutbourne Place Farm Nutbourne Lane Nutbourne West Sussex

The Authority has considered your application, and I can confirm that the submitted information is acceptable pursuant to the following condition(s):

3. **Pre-Commencement Condition**: No development shall commence until the following components of a scheme to deal with the risks associated with contamination, (including asbestos contamination), of the site be submitted to and approved, in writing, by the local planning authority:

(a) A preliminary risk assessment which has identified:
- all previous uses
- potential contaminants associated with those uses
- a conceptual model of the site indicating sources, pathways and receptors
- potentially unacceptable risks arising from contamination at the site.

The following aspects (b) - (d) shall be dependent on the outcome of the above preliminary risk
assessment (a) and may not necessarily be required.
(b) An intrusive site investigation scheme, based on (a) to provide information for a detailed risk assessment to the degree and nature of the risk posed by any contamination to all receptors that may be affected, including those off site.
(c) Full details of the remediation measures required and how they are to be undertaken based on the results of the intrusive site investigation (b) and an options appraisal.
(d) A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in (c) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action where required.
The scheme shall be implemented as approved. Any changes to these components require the
consent of the local planning authority.
Reason: As this matter is fundamental to ensure that no unacceptable risks are caused to

humans, controlled waters or the wider environment during and following the development works and to ensure that any pollution is dealt with in accordance with Policies 24 and 33 of the
Horsham District Planning Framework (2015).

Date of approval - 27th May 2025

The development shall be implemented in accordance with the approved plans and details listed in the schedule below.

Schedule of plans/documents:

Plan Type	Description	Drawing Number	Received Date
Supporting Docs	Contaminated Land Intrusive Investigation	NONE	01.04.2025

Notes to Applicant:

If, during development, contamination not previously identified is found to be present at the site then no further development shall be carried out until a remediation strategy has been submitted to and approved by the local planning authority detailing how this unsuspected contamination shall be dealt with. The remediation strategy shall be implemented as approved.

This letter constitutes a legal document which should be regarded as an addendum to the original planning application.

If you have any queries or require further information, please do not hesitate to contact the Case Officer.

Yours faithfully

Emma Parkes
Head of Development and Building Control
