

5 Beedingwood Drive, Colgate, Horsham, West Sussex, RH12 4TE

T1 - T1 - Beech tree situated on the front left hand side of the garden to be felled. Upon my inspection, there is a meripilus bracket at the base of the stem along side a large rot pocket on the left hand stem which is leaning towards the property. I am under the impression that a survey of the tree was carried out back in 2011, giving the tree approximately 20 years until considered dangerous.
