### Description

Please describe details of the proposed development or works including any change of use

#### Description of Proposed Development

##### Internal Works

The proposal includes the creation of a new mezzanine floor (GIA 202sqm) within the existing Studio of the Leisure Centre. The mezzanine will form a new first-floor level to provide:

Additional multi-use studio space

An office

Accessible WCs

Associated circulation and support areas

The works involve internal alterations only, with no change of use. The existing Studio will retain its leisure function, with the new mezzanine enhancing the operational capacity of the facility.

##### External Works

The proposal includes minor external alterations to support the new mezzanine and improve the functionality of the building:

Installation of new first-floor windows to provide natural light and ventilation to the mezzanine level

Construction of a single-storey extension (13sqm) to the existing storage area, providing additional secure storage to support the main gym hall

These external works are modest in scale and designed to integrate with the existing building form and materials.

### Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

## Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes  
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

**Reason biodiversity net gain does not apply:**

Development subject to the de minimis exemption (development below the threshold)

**What best describes the size of your site?:**

Over 25 square metres

**Please justify the reason why biodiversity net gain does not apply:**

The proposed development does not trigger the requirement for Biodiversity Net Gain under the Environment Act 2021 and associated secondary legislation. The external works comprise a 13sqm single-storey extension to an existing storage area. This is significantly below the 25sqm threshold at which BNG becomes applicable for non-exempt developments. The internal works involve the creation of a 202sqm mezzanine floor entirely within the existing building envelope. These works do not affect external land, do not alter the site's ecological baseline, and do not constitute development that impacts habitat. As the internal works occupy only the existing internal volume of the building, and the external works fall well below the statutory minimum area, the proposal is classed as de minimis for the purposes of BNG. No habitat will be lost or modified, and the development does not result in any change to the site's biodiversity value. Accordingly, the application is exempt from the requirement to provide a Biodiversity Net Gain assessment or metric calculation.

Note: Please read the help text for further information why developments may be exempt or not in scope.
