Good afternoon [REDACTED]

Thank you for getting back to me [REDACTED] Much appreciated.

I must send you photos in three emails as I don't think the system will cope with too many attachments.

I understand that Andrew [REDACTED] for his information I do attach photos of the tree's current situation. It has continued to deteriorate since his visit and which is not retrievable. The overriding concern now is that the root system is also deteriorating and a storm could blow it down quite easily. If it collided with the house the damage could be considerable.

Please let me know if you require further information. I am not sure my tree surgeon can add much to what is already known.

Kind regards,

Peter.
