Hi Sam,

Please find attached a drawing to indicate the proposal location for buggy storage/parking on the site.

To promote sustainable travel choices and encourage walking to the nursery, a dedicated buggy store is proposed adjacent to the main nursery entrance. The facility will provide secure storage for a minimum of six folded pushchairs, allowing parents and carers to leave buggies safely on-site during drop-off and collection periods.

The buggy store is proposed in a highly accessible location immediately adjacent to the nursery entrance, ensuring convenient use by those arriving on foot. The store will be enclosed and weatherproof, with lockable double doors secured by either a coded lock or padlock system to provide protection against unauthorised access and theft.

The proposed location has been carefully selected to ensure that it does not obstruct pedestrian routes, emergency access arrangements, parking spaces, or vehicle manoeuvring areas. The store will be positioned within an existing corner of the site, making efficient use of underutilised space whilst maintaining safe circulation throughout the nursery grounds.

In addition to its secure construction, the buggy store will benefit from a high level of natural surveillance. It is located immediately adjacent to the nursery's fully glazed entrance and reception area, ensuring that it remains visible to staff and visitors throughout the operational day. This passive surveillance will provide an additional layer of security and help to discourage anti-social behaviour.

The provision of secure, convenient and weather-protected buggy storage represents a positive sustainable transport measure, reducing barriers to walking and supporting families who choose to travel to the nursery on foot. The proposal therefore contributes to the promotion of active travel and aligns with local and national planning objectives relating to sustainable transport and healthy lifestyles.

Please let me know if you require any further information or clarification.

Regards

James
