Attachments: ufm2_Environmental_Health_Consultation_Sheet.pdf

Hi Matthew and Happy New Year.

I have reviewed the Technical Note 2 submitted by Sharps Redmore, project number 2019527 dated 13th December 2024 .

The report has concluded that based on measurement and calculations there should be no adverse noise impact from the operation of the externally located plant. The report does not include a full spectrum analysis but does confirm that no tonal, impulsive or intermittent characteristics were discernible in the noise from the plant at the nearest noise sensitive receptor.

It is considered sufficient information has been provided to discharge condition 19 to approved application DC/21/1413. The applicant should be advised that any changes to the location and quantity of external plant should be subject to a new noise assessment to ensure that there is no adverse impact on noise sensitive receptors.

Regards.

Lee
