My response is as follows:

1) I know the field, having shared a boundary with it since we moved to Woodcote in June1985. I have known it to be cut for hay, and understand it used to be used for donkeys.

2) The [redacted] family.

3) I am aware of its use for domestic recreation, which sometimes generates significant noise, which one lives with. However, the installation and use of the zipwire and platform which overlook Backsett's [redacted], conservatory and garden is not acceptable.

4) It is a field. If its designation is changed, it would open up the risk of a host of further developments inappropriate to a rural neighbourhood.

regards,
