13 Willow Place, Barns Green, Horsham, RH13 0BA (member of public)

I wish to strongly object to this planning application by Miller Homes.

My main concerns are:

1/ The increased traffic volume along Chapel Road will cause more congestion and increase the risk of accidents. As the Bus service for the village is inadequate, this will cause an increase in traffic and emissions.

2/ There will an increase in demand for services. Electricity, Gas, Water, Drainage, Sewage – which are already strained/failing. This will be made worse by adding a further 68 dwellings. I understand on the Sumners Ponds development only 6 houses are occupied and have electricity supplied from diesel generators!

3/ Taking into account the recent heavy rainfall, it is a great concern that to “concrete” over this field” the flooding will be even worse than we already have on Chapel Road. It would appear the local shop opposite the field has suffered from flooding in the past.

4/ I understand it is proposed to remove the ancient hedgerow fronting Chape Road. It is a refuge for wildlife and holds soil onto the land reducing surface runoff. The hedge adds to the rural character of to the village.

Regards,
